

## **Statistics on late term terminations**

In 2019, there were 4,450 terminations in South Australia as recorded by SA Health.

- 25 at 20 weeks
- 26 at 21 weeks
- 21 at 22 weeks
- 8 at 23 weeks
- 0 at 24 weeks
- 2 at 25 weeks – this is very unusual.
- Nothing beyond

The predominant reason is congenital abnormalities.

It is also worth noting that there is a decline in the number of terminations, including among teenagers. This Bill won't lead to an increase in the number of terminations.
